2.1 Support

If you're have any problems please email nazmiev69@gmail.com

Also you can get help there:

- Alternative email: robert.nazmiev@yahoo.com
- [VK page](#)

2.2 Dependencies

- [Apache 1.51+](#)
- [Mysql](#)
- [PHP 7+](#)
- [Java 8+](#)

2.3 Download source files

The latest stable version you can clone from remote GIT repository:

- SSH.:

```
git clone git@github.com:RlyEasy/cinema.git
```

- HTTPS.:

```
git clone https://github.com/RlyEasy/cinema.git
```

2.4 Installation

You can move downloaded from repository files to your root server directoty or just run BASH script with install mode.:

```
bash deploy.sh -i git@github.com:RlyEasy/cinema.git
```

After that you need to change authentication method for your root MySQL user.:

```
sudo mysql -u root -e "use mysql; update `user` set `plugin`='native_mysql_password' where `user`='root';"
```

And restart Apache server.:

```
sudo service apache2 restart
```

2.5 Getting Updates

For getting the newest version of the app use BASH script in the update mode.:

```
bash deploy.sh -u AWS
```

2.6 Reset Server Settings

If you want to delete application from your server run BASH script with clear mode.:

```
bash deploy.sh -c AWS
```
